Please ensure that all users of the headset read the following warnings carefully before using the headset.

By using the product in any way, you agree to adhere to and be bound by the safety warnings below. For the latest version of the health and safety warnings, please visit our homepage www.zeissvrone.tumblr.com

Safety and operation

- Do not use while driving or performing physical activities. Only use in safe surroundings and while seated. Make sure you are not close to any other people or objects which might get damaged or hurt you.
- If you experience symptoms such as dizziness, motion sickness, perceptual after effects, nausea, impaired vision, numbness, twitching of eyes or muscles, loss of consciousness, disorientation, neck pain, any kind of involuntary movement or cramp while using the glasses, please take them off and consult a doctor before re-using them.
- The probability of the above mentioned symptoms occurring varies depending on the app, content and smartphone used.
- Follow all safety instructions of your smartphone. For example environmental conditions for temperature, humidity, electro-magnetic compliance, cleaning and charging of the device.
- Anyone who has a serious medical condition, e.g. who experiences seizures, loss of consciousness, or other symptom linked to an epileptic condition, elderly people, pregnant women, strabismus, migraine, neck problems, dizziness should see a doctor before using the headset.
- Adult supervision is strongly recommended. Children under the age of 14 should not use the headset at any time.
- Regular breaks must be taken when using the device for longer periods of time. After 30 minutes of use, we recommend at least a 15 minute break.
- 3D content, flashlights and light effects may cause epileptic seizures.
- Make sure that you have the right slide for your smartphone model, the phone is inserted securely and the head straps are tightened.

- To avoid loss of hearing follow the safety instructions of your smartphone and do not listen to audio content at high sound pressure levels for extended periods of time.
- Do not place or use the device in direct sunlight.

Care and cleaning

The front shield and the inner lenses can be cleaned using a clean microfiber cloth. If the front shield is particularly dirty, a PH neutral liquid detergent can be used with a damp cloth. To avoid damaging the surface, do not dry or rub the front shield or the lenses.

Warnings

Do not scratch the surface of the optical lenses as a surface free from scratches is essential in order to ensure a good visual experience.

Storage

The headset should be stored safely.

Storage temperatures

-20 ... +60°C

Environmental temperatures

+5 ... +35°C
